IBR Data Element Field Guide

Data collected through the New York State Incident Based Reporting (IBR) program is made up of 68 data elements, most of which coincide with a data entry field available in the Spectrum Justice System (SJS)*. In most instances, the name of an SJS data entry field is similar to the name of the corresponding IBR data element, however, some IBR data elements are not readily apparent from the name used by the SJS data entry field.

This reference table is designed to assist SJS agencies in troubleshooting IBR errors that are generated within SJS or returned to the agency from the State's IBR Transaction Report. The table provides the corresponding SJS data entry field and its location within SJS for each IBR data element listed. This table should be used to identify and locate those IBR variables that are listed in capital letters within an IBR error message.

Example:

The example below illustrates how to use this reference to translate IBR Error Message #725.

725 - If PROPERTY INVOLVEMENT is Stolen and PROPERTY TYPE is equal to a motor vehicle, at least one offense segment must have an INCIDENT LARCENY TYPE of motor vehicle theft

The SJS data entry field associated with the IBR data element PROPERTY INVOLVEMENT is **Status** which is located on the **Incident Property Screen** on the **Details Tab**.

The SJS data entry field associated with the IBR data element PROPERTY TYPE is **Type** which is also located on the **Incident Property Screen** on the **Details Tab**.

The SJS Field associated with the IBR data element INCIDENT LARCENY TYPE is **Larceny/Theft** which is located on the **Incident Charge Screen** on the **Offenses Tab**.

In this incident PROPERTY INVOLVEMENT or **Status** is *Stolen*, the PROPERTY TYPE or **Type** is *Automobile* and the INCIDENT LARCENY TYPE or **Larceny/Theft** is *All Other Larcenies*.

To correct the error, the INCIDENT LARCENY TYPE or **Larceny/Theft** would need to be changed from *All Other Larcenies* to *Motor Vehicle Theft*.

*Some SJS data entry fields collect data that is not collected through the IBR program.   While this data may be used by your agency, it is not included in the monthly IBR submission file.
