I. INTRODUCTION

The New York State Division of Criminal Justice Services (DCJS) implemented Operation IMPACT in 2004, targeting the 17 New York State counties that account for more than 80 percent of Part 1 index crime in the state outside of New York City.¹ This initiative has provided participating law enforcement agencies with the information, tools and resources necessary to implement a data-driven approach to policing.

Operation IMPACT is a highly focused initiative, with a strong emphasis on law enforcement partnerships, crime analysis, intelligence development and information sharing. To ensure Operation IMPACT resources are funneled to the appropriate areas, the jurisdiction that accounts for the highest volume of violent crime within each county is named as the “primary jurisdiction” and is the focus of the IMPACT crime reduction efforts. The table below lists the 17 participating counties and their respective primary jurisdiction police departments.

COUNTY	PRIMARY JURISDICTION POLICE DEPARTMENT
Albany	Albany City Police Department
Broome	Binghamton City Police Department
Chautauqua	Jamestown City Police Department
Dutchess	Poughkeepsie City Police Department
Erie	Buffalo City Police Department
Monroe	Rochester City Police Department
Nassau	Nassau County Police Department
Niagara	Niagara Falls City Police Department
Oneida	Utica City Police Department
Onondaga	Syracuse City Police Department
Orange	Newburgh City Police Department
Rensselaer	Troy City Police Department
Rockland	Spring Valley Village Police Department
Schenectady	Schenectady City Police Department
Suffolk	Suffolk County Police Department
Ulster	Kingston City Police Department
Westchester	Yonkers City Police Department

¹ Part 1 crimes are the seven index crimes reported to DCJS by all New York State law enforcement agencies as part of the federal Uniform Crime Reporting (UCR) program. They are violent crimes of: **murder, rape, robbery, and aggravated assault**; and the property crimes of **burglary, larceny, and motor vehicle theft**.

A. Law Enforcement Partnerships

The crux of Operation IMPACT is having in place strong, solid law enforcement partnerships from which to draw resources, expertise and assistance. Each of the 17 Operation IMPACT counties has assembled an IMPACT partnership composed of representatives from all levels of law enforcement. The partnership is co-chaired by the primary jurisdiction's chief or commissioner of police and the county district attorney. The other agencies represented are the county Sheriff's Office and Probation Department; New York State Police; Department of Corrections and Community Supervision; various federal law enforcement agencies such as the Federal Bureau of Investigation (FBI), Bureau of Alcohol Tobacco and Firearms (ATF), the Marshal's Service, and the United States Attorney's Office. Each year, applications submitted for Operation IMPACT funding must include a memorandum of understanding signed by authorized individuals from each of these agencies, indicating their willingness to contribute to the crime reduction efforts within those jurisdictions and counties.

In addition to the 17 primary police departments, three of the partnerships include secondary police departments as participating agencies. The violent crime volume in these jurisdictions doesn't reach the level of the primary jurisdiction but is substantial enough to warrant participation in the program. Those jurisdictions are Hempstead Police Department (Nassau County), Middletown Police Department (Orange County), and Mt. Vernon Police Department (Westchester County).

The benefit of law enforcement partnerships is that they afford the ability to harness numerous resources, focusing them on the most persistent crime problems within each IMPACT jurisdiction. Each individual agency offers different perspectives, skill sets and resources to law enforcement. In addition, partnerships allow resources to be coordinated, avoiding the potential for having two different agencies expend time, money and effort investigating the same offender or incident.

B. The Analysis of Timely, Accurate Crime Data

Crime analysis has proven to be the strongest component of IMPACT. The benefit of a crime analysis program is that it creates a crime "picture" based on the timely and accurate data collected and reported by each police department. IMPACT law enforcement agencies are contractually required to submit their Uniform Crime Reporting (UCR) Part 1 reports within 30 days of the end of the reporting month. The quality of the crime data being reported by the IMPACT agencies has been both expanded and improved by working closely with the DCJS Crime Reporting and Data Quality Unit. IMPACT jurisdictions also submit a shooting incident and victim report to DCJS monthly so that this important measure of crime can be tracked.

As the quality and timeliness of the crime data improved, agency command staff began to use the data to make informed decisions about when, where and what type of resources to deploy in response to the patterns and trends revealed through the analysis of crime. Today, IMPACT can lay claim to the fact that every IMPACT chief or designated command staff

member meets frequently with other staff members to review recent crime trends and develop a plan to address those trends.

C. Intelligence Development and Information Sharing

Another critical outcome of Operation IMPACT is the enhanced ability of the IMPACT law enforcement agencies to cultivate intelligence and share information with other IMPACT partner agencies within their specific county and beyond. One of the first goals of Operation IMPACT was to encourage each participating agency to find ways to share the information at their disposal with their partners. This included information about their most persistent crime problems, the areas within their jurisdiction with the highest volume of crime and current investigations, for example. This concept, although seemingly simple, meant breaking down barriers that existed among law enforcement agencies for decades. The sharing of information began simply, with partners exchanging information around the table at monthly Operation IMPACT meetings. It has now evolved to near-daily sharing of intelligence and information through regular joint operations and details, shared databases, intelligence bulletins, and more.

In addition, all 17 partnerships utilize the field intelligence concept to facilitate this regular flow of information among agencies. Almost every participating IMPACT law enforcement agency has assigned a field intelligence officer (FIO) who works to obtain as much intelligence as possible through the regular debriefing of arrestees, probationers, parolees, inmates and other persons of interest. Unlike interrogation, debriefing is an interview method used to obtain actionable intelligence – information that might prove useful in solving other, unrelated crimes and paint a more complete picture of the crime conditions within a given jurisdiction. In nearly all 17 counties, the FIOs within a partnership work closely together, in some instances even becoming a stand-alone unit. They coordinate the gathering of criminal intelligence based on the particular crime trends of the previous week or month. This maximizes their effectiveness, as the team is then able to determine the exact topic and population to target when conducting their debriefings. For instance, if crime analysis indicates that a cluster of burglaries has occurred in a particular area, the probation and parole FIOs, in concert with the police department and sheriff's office FIOs, might debrief all of the people under supervision for a charge of burglary or those that live in the cluster area. The FIOs share all of the information they obtain with patrol, investigative, supervisory and command staff to enhance their ability to conduct day-to-day operations.

II. OPERATION IMPACT FUNDING

A. Award Process

Each spring, the DCJS Office of Public Safety (OPS) releases a request for applications (RFA) for funding to support Operation IMPACT crime reduction initiatives. In 2012, DCJS staff analyzed reported Part 1 crimes and provided IMPACT agencies with target crimes of focus. These crimes were chosen based on the latest data available and focused on crimes that were trending upward in each jurisdiction. The RFA is specific, guiding applicants to provide the strategy they propose to address the identified crimes; the role that each partner agency,

whether receiving funding or not, will play in implementing the proposed strategy; and the amount of funding that they believe will be required to effectively implement their proposed strategy.

Each of the 17 participating partnerships must submit a single, comprehensive application in response to the RFA. This was originally designed to facilitate a deeper level of collaboration between the various law enforcement agencies that had traditionally worked independently and, for the most part, had different missions. The belief was that by working together to analyze the crime, develop the strategy and submit the applications, the participating agencies would have a common goal for which to strive.

Agencies eligible to apply for and receive funding are the district attorney's office, the primary police department, secondary police departments, the sheriff's office and the probation department. The 2012-13 IMPACT RFA was open to only those agencies that received a 2011-12 Operation IMPACT award.

New York State and federal agencies are not eligible to apply for funding under this initiative, but the strategy proposed through each application must include the active participation and contributions of these agencies.

Once the applications were received, OPS staff reviewed them and made funding recommendations to the DCJS Executive Deputy Commissioner. Recommendations are based on the strength of the proposed crime reduction strategy; prior year compliance with program and contract requirements; and the volume of crime within the primary jurisdiction and the county. The 2012-13 Operation IMPACT awards were as follows:

County	Award Amount
Monroe	\$1,723,300
Erie	\$1,494,500
Westchester	\$1,347,450
Suffolk	\$1,170,580
Onondaga	\$1,093,300
Nassau	\$971,400
Albany	\$873,400
Orange	\$676,850
Schenectady	\$721,900
Niagara	\$611,900
Rensselaer	\$488,700
Oneida	\$436,300
Broome	\$377,700
Dutchess	\$339,375
Rockland	\$185,900
Ulster	\$249,300
Chautauqua	\$226,100

B. Personnel

In 2012, Operation IMPACT funding supported *113 positions* including police officers and investigators, assistant district attorneys and DA's investigators, probation officers, sheriff's deputies, crime analysts and field intelligence officers. Approximately 46 percent of the funded positions are dedicated to the crime analysis and intelligence development and information sharing facets of the program. IMPACT funding supports *20 crime analysts* and *33 field intelligence officers*. This is an excellent illustration of the partnerships' commitment to those two components of the program and how they have become standard operating procedure within participating agencies.

C. Initiatives

Each year, the Operation IMPACT partnerships are required to develop a comprehensive strategy to address Part 1 crime, particularly violent crime, within the primary jurisdiction. Each strategy is comprised of different initiatives and each initiative is intended to address a particular crime problem or problems.

The following initiatives are the most common to the crime reduction strategies developed by the 17 county partnerships.

- 1. Directed/Saturation Patrols** – These patrols, often supported through Operation IMPACT funding, are planned using the most up-to-date crime data available so that they are conducted at the appropriate time, and days of the week, targeting the crime hot spots of the jurisdiction, thereby having the maximum effect on identified spikes in crime. These patrols are generally led by the primary police department, but often include major contributions of time and staffing by the county sheriff's office, the New York State Police, and, in some instances, secondary police departments.
- 2. Probation/Parole Home Visits** – Probation and parole officers have easier access to the people they supervise than the police, and can conduct random home visits, for example. Probation and parole conditions often include curfews, drug and/or alcohol abstinence and prohibition on being in bars or other drinking establishments. As such, the police departments in all 17 primary IMPACT jurisdictions generally include probation/parole joint home visits as part of their strategy. Crime analysis is used to hone the focus of these visits. For example, if robbery is spiking, the police and probation/parole officers may visit all those under supervision for a robbery offense, or all probationers or parolees that live in the area where the increase is occurring. These initiatives have been very successful in not only obtaining actionable intelligence, but also in making those still under supervision aware that their officers are teaming up with the police in a focused manner.

There are variations on the home visit initiative. Joint operations between police and probation/parole have been conducted at problem establishments as part of a focused effort to build a case against a particular bar or social club. These operations often

include the New York State Liquor Authority and other local departments (code, health, fire, etc.). Operation IMPACT funding provides many probation departments in particular with the opportunity to conduct these off-hours details. Parole has conducted “Meet and Greet” operations, requiring their parolees to report to the police station at a predetermined date and time where they are then drug-tested, searched and debriefed.

3. **Warrant Sweeps** – Operation IMPACT funding is often used to conduct warrant sweeps, which seek offenders with more serious warrants or to apprehend offenders who have outstanding warrants and a previous history of violent crime. Sex offenders and individuals with outstanding domestic violence charges also are targeted through these sweeps.
4. **Chronic Offender Initiatives** – There are several different variations of this initiative, but the main concept is a heightened level of accountability for the most serious offenders by identifying and focusing on those who are known to commit a disproportionate percentage of the jurisdiction’s violent crime. The work of crime analysts is critical to these initiatives, as they generally use very specific criteria to develop the list of chronic offenders. Once the list is developed, other initiatives, such as home visits and warrant sweeps, can be used to hold these offenders accountable if they are currently under supervision or have an outstanding warrant against them. The list is reviewed and updated regularly.
5. **Narcotics and Gang Operations** – A portion of every jurisdiction’s violent crime can be attributed to drug and gang activity. In addition to the violent crime associated with these two factors, open-air drug dealing and street-level gang activity can significantly reduce the quality of life within neighborhoods. Undercover operations, foot patrols, saturation patrols and programs designed to intervene in the aftermath of gang and gun violence have had some success in addressing these illegal activities.
6. **Enhanced Prosecution Efforts** – Most IMPACT strategies include some level of enhanced prosecution for violent offenses or firearm-related violent crime. Flagging IMPACT cases for vertical prosecution and creating no-plea zones within a jurisdiction are just two examples of how district attorneys’ offices target violent crime.
7. **Intelligence-Led Policing** – IMPACT agencies have been encouraged to utilize the services of their crime analysts to drill down into reported crimes to determine patterns as well as to attempt to predict future criminal activities. Additionally, the services of the Crime Analysis Centers throughout the state have been utilized to provide information on shared offenders as well as to share information crime trends and to provide success stories in combating and solving these crimes.

D. Benefits of IMPACT Funding to Local Agencies

Operation IMPACT provides reinforcement and critical funding that allows local agencies to maximize their ability to police effectively during difficult fiscal times. Law enforcement executives have repeatedly stated that without IMPACT funding, vital positions would be lost, the ability to analyze crime would significantly shrink and funding for additional, strategic operations would dry up, leaving them without the resources to stem crime. For several years now, IMPACT chiefs, commanding officers and other administrators have indicated that their approved complement of officers has shrunk, sometimes to levels not seen in 20 years, and their overtime budgets have been significantly reduced, leaving them to use their overtime to staff for regular patrol shifts. IMPACT provides the additional financial resources for targeted operations that make a difference.

All funding requested through IMPACT must reasonably outline why a requested budget item can't be supported in the agency's general budget. Budgets must also include clear justification as to how each particular item requested is vital to strategy implementation. Partner agencies that are eligible for funding use the support they get through this program in a variety of different ways. Whether the request is for personnel, equipment, or consultant services, each funding area provides the support needed to successfully implement their strategies. Funding requests are carefully analyzed for need and funding awards are closely monitored.

III. PARTNERSHIP HIGHLIGHTS AND STRATEGIES

Each of the 17 IMPACT partnerships uses a significant portion of their funding to implement their strategies to reduce violent crime. Police departments receive little to no funding within their operating budget to develop and conduct targeted anti-crime initiatives beyond their daily operations.

IMPACT funding provides this valuable support but with ample oversight from DCJS to ensure strategies are focused and tied into the overall goal to reduce specific Part I crimes. Each partnership has its own unique initiatives and in 2012, DCJS determined the targeted crimes on which each jurisdiction was required to focus.

A bulleted summary of each jurisdiction's targeted crime and their strategies to address them are as follows:

ALBANY COUNTY – City of Albany Police

Targeted Crimes: Firearms, Aggravated Assaults/Domestic Violence and Larceny

Agency Personnel Funded through Operation IMPACT

- The Albany Police Department has a full-time intake specialist to assist domestic violence victims with the criminal justice process and provide victim services referral; a youth aide to track juvenile crime and coordinate the provision of education, services, and viable alternatives to the offender and his/her family; a supervising crime analyst, crime analyst and geospatial information system mapping technician to provide analytical support to the department and partner agencies.
- The Albany County District Attorney's Office has a dedicated gang and safe home/safe streets prosecutor.
- The Albany County Sheriff's Office and Probation Department utilize IMPACT funding for dedicated field intelligence officers.

Partnership Coordination

- Night Watch is a targeted effort to visit offender's identified as high-risk for repeated criminal offense and has served as a useful deterrent to fighting crime.
- The New York State Police continue to partner with the city of Albany through blue-grey patrols, which allow a trooper to ride with an Albany officer to enhance officer safety and increase the police presence in identified high-crime areas.
- The Albany County District Attorney's Office Operation Speeding Bullet addresses gun crimes by having a senior assistant district attorney handle all gun possession arrests and prosecutions.
- The Albany IMPACT partnership participates in the Meares Project, a program specifically designed to reduce recidivism among recently releases offenders.
- The Albany Police Department in partnership with the state Attorney General's Office Organized Crime Task Force and state Police in 2011 targeted for investigation a violent downtown gang. The investigation culminated in March of 2012 with the indictment of 50 individuals. Items seized included 19 long firearms, three handguns, one Mac 11 handgun, 230 grams of cocaine, 300 grams of heroin and two pounds of marijuana.
- The IMPACT-funded domestic violence intake specialist is responsible for making contact with all victims of domestic violence, even where no criminal offense occurred. The intake specialist also is responsible for data entry into the domestic violence database and with assisting in the preparation of accusatory instruments. The intake specialist is responsible for assisting victims and their children in finding safe housing, as well as referrals for domestic violence counseling.

BROOME COUNTY – City of Binghamton Police

Targeted Crimes: Burglary, Larceny and Robbery

Agency Personnel Funded through Operation IMPACT

- The Binghamton Police Department and Broome County Sheriff's office utilize IMPACT funding for two, full-time field intelligence officers. These officers play a crucial role in the gathering of intelligence related to gang and narcotics activity, as well as the crimes of focus for the Broome IMPACT partnership.
- The Broome County District Attorney's Office utilizes IMPACT funding for a full-time assistant district attorney assigned to prosecute most crimes related to the IMPACT crimes of focus. The District Attorney's Office also utilizes a full-time, IMPACT-funded crime analyst to help analyze crime trends and employ effective crime reduction strategies based on timely data-driven intelligence.

Partnership Coordination

- The Broome County IMPACT partnership has conducted more than 150 initiatives aimed at reducing crime. These initiatives have been accomplished with the use of 2,100 personnel hours from the Binghamton Police Department and other partner agencies.
- The Binghamton Police Department continues to use a Compstat-style process in order to target specific strategies to reduce long-and short-term crime trends in the partnership area. These meetings are held regularly and utilize information gathered from the IMPACT-funded field intelligence officers and crime analyst.
- The Binghamton Police Department is developing a regional intelligence center that is to be located at the Binghamton Police Department headquarters. This center will be staffed with the IMPACT-funded field intelligence officers and crime analyst as well as additional personnel funded by the Binghamton Police Department.
- The Binghamton Police Department continues to increase the use of closed circuit cameras to aid in crime reduction. There are currently 19 cameras placed in high-crime locations throughout the IMPACT zone.

CHAUTAUQUA COUNTY – City of Jamestown Police

Targeted Crimes: Robbery, Burglary and Aggravated Assaults

Agency Personnel Funded through Operation IMPACT

- The Jamestown Police Department utilizes grant funding for a full-time crime analyst. The crime analyst provides support and coordination to the department's field intelligence network in order to collect and disseminate timely and accurate crime data and intelligence and works closely with command staff to assist in the effective and efficient deployment of law enforcement resources.

- The Chautauqua County District Attorney's Office receives funding for a full-time assistant district attorney dedicated exclusively to the prosecutorial needs of the Operation IMPACT jurisdiction. The funding of an additional full-time assistant district attorney substantially strengthens the ability of the District Attorney's Office to prosecute the approximately 500 felony arrests made by the Jamestown Police Department each year.
- The Chautauqua County Sheriff's Office receives funding to partially support a full-time field intelligence officer (FIO). The Sheriff's Office FIO collects field intelligence from a broad range of resources on a regional and national scale as well as from the Operation IMPACT jurisdiction. The Sheriff's Office then pushes this information to an extensive network of law enforcement agencies for utilization in the field.

Partnership Coordination

- The Chautauqua County Operation IMPACT Partnership has successfully worked with agencies that do not have traditional law enforcement powers, but have been effective in addressing crime issues and urban blight, including the Jamestown Department of Economic Development and the Jamestown Board of Public Utilities.
- In November 2012, drug sweeps conducted at various locations resulted in multiple grow operations being shut down, significant quantities of marijuana, cash and guns seized.
- Through the Jamestown Police Department's award-winning domestic violence initiative, Project Cross Roads, the Jamestown Police Department continues to take an aggressive zero-tolerance approach to domestic violence.

DUTCHESS COUNTY – City of Poughkeepsie Police

Targeted Crimes: Aggravated Assault, Larceny and Burglary

Agency Personnel Funded through Operation IMPACT

- The Dutchess County District Attorneys' Office utilizes IMPACT funding for a full-time assistant district attorney who oversees the Dutchess County Field Intelligence Group, the Dutchess County Violent Crime Task Force and prosecutes violent and chronic offenders arrested through the collaboration of the IMPACT agencies.

Partnership Coordination

- The Dutchess IMPACT Partnership, along with the Dutchess County Field Intelligence Group and Dutchess County Violent Crime Task Force, collaborated in a proactive operation geared at aggressively combating the increasing number of stolen property crimes in the IMPACT area and throughout Dutchess County. Property stolen during robberies, residential burglaries, vehicle break-ins, and shoplifting was quickly resold in local pawn shops and small stores. The operation's objective was to identify the businesses in the IMPACT area and throughout Dutchess County that knowingly purchased and disposed of stolen property. The operation resulted in the execution of nine search warrants resulting in 11 persons arrested for crimes associated with receiving or selling stolen property.

- IMPACT-specific funding was used to purchase a software module for the city of Poughkeepsie that allows the department's supervisors to retrieve real-time data on crime, locations, times and other relevant data which aids in directing patrol functions. This equipment is used in coordination with weekly Compstat meetings held by the Poughkeepsie Police crime analysis and administrative staff to conduct real-time, specific analysis that allows the department to more efficiently direct resources to combat crime.
- The Dutchess IMPACT partnership, along with the assistance of the Dutchess County Field Intelligence Group, has continued its efforts to further strengthen the investigation and prosecution of gun crimes, burglaries and aggravated assaults through the implementation of a chronic offender list.

ERIE COUNTY – City of Buffalo Police

Targeted Crimes: Firearms, Burglary and Robbery

Agency Personnel Funded through Operation IMPACT

- The Buffalo Police Department utilizes IMPACT funds to support a detective who is assigned to the U.S. Marshal's Violent Felony Task Force, a report technician to assist with Part 1 crime reports/data, a crime analyst and to run selective enforcement and targeted patrol operations.
- The Erie County District Attorney's Office receives funding for a senior IMPACT assistant district attorney who serves as the liaison between prosecutorial and law enforcement efforts, in addition to three assistant district attorneys, a crime analyst, a confidential investigator, a criminal intelligence specialist and a legal secretary supporting this personnel.
- For the Erie County Sheriff's Office, IMPACT funds support a field intelligence officer who debriefs individuals brought to the Erie County Holding Center.
- The Erie County Probation Department received funding for two probation officers and resources to work with Buffalo Police canine unit on targeted home visits.
- Erie County Central Police Services uses IMPACT funding to support a senior evidence clerk who is tasked with the responsibility of receiving, logging and storing the firearms that are submitted to the laboratory, and also, an assistant information systems specialist who assists computer operations and data facilitation.

Partnership Coordination

- The Buffalo/Erie County IMPACT partnership has worked closely with federal partners on several major cases, including investigating the "LRGP" Gang. In 2012, Buffalo Police, Erie County Sheriff's Office, the FBI, New York State Police and other law enforcement teams conducted a lengthy investigation centered on this East Side gang, which was involved in many shootings and drug trafficking. At least 20 members and associates have been arrested.
- In addition to investigating the East Side gangs, Buffalo Police and other law enforcement partners used IMPACT resources to target gangs on Buffalo's west side, specifically the 7th Street and 10th Street gangs. A federal grand jury has returned indictments that accuse at least 12 gang members of racketeering conspiracy, multiple violent crimes, including murder associated with racketeering, drug trafficking and firearms offenses.

- Erie County IMPACT probation officers have conducted 276 unannounced home visits, 65 percent of which were conducted with the aid of Buffalo Police K-9. These home visits have resulted in nine arrests, the confiscation of drugs, drug paraphernalia, knives and the filing of 21 violations of probation. Probation also conducted 259 debriefing interviews on probationers re-arrested, which resulted in 35 arrests on weapons charges, 27 on burglary and 17 on robbery, as well as field intelligence that helped with ongoing criminal investigations.
- In 2012 the Erie County Central Police Services Forensic Lab received 632 firearms for processing. In addition, 368 firearms have been swabbed for DNA, and 262 gun swabs have gone through the DNA typing process at the request of the District Attorney's Office and/or the U.S. Attorney's Office.
- Since January 2012, the IMPACT domestic violence crisis case manager has assisted 639 victims of domestic violence. This project, between the Buffalo Police Department and Crisis Services, provides "pre-arraignment" advocacy and has had significant impact with victims who have historically encountered challenges and barriers to moving forward in the criminal justice process. IMPACT funding also supports youth mentoring initiatives to break the cycle of violence in high-risk areas.
- This year's IMPACT grant included funding for Buffalo Police to hold community policing meetings in each of the five police districts to discuss Crime Prevention Through Environmental Design (CPTED). CPTED is a crime reduction strategy that explores environmental conditions that may cause an area to be more prone to criminal acts.

MONROE COUNTY – City of Rochester Police

Targeted Crimes: Firearms, Robbery and Burglary

Agency Personnel Funded through Operation IMPACT

- The Monroe County District Attorney's Office utilizes IMPACT funding to support eight full-time, experienced felony prosecutors. During the IMPACT grant year, these ADAs were assigned 716 new IMPACT crime cases, and obtained 178 indictments and 512 felony and misdemeanor convictions.
- The Monroe County Sheriff's Office and the Monroe County Probation Department utilize IMPACT funding to support two field intelligence officers.
- The Monroe County Sheriff's Office utilizes IMPACT funding to support a full-time criminal investigator who is assigned to the Monroe Crime Analysis Center.

Partnership Coordination

- IMPACT overtime funding allows the Rochester Police Department (RPD) to run proactive details to combat patterns of violent and property crime as they are identified by the Monroe Crime Analysis Center. Overtime details are also used to target problem offenders as well as to intervene in violent disputes between gangs or drug crews. In 2012, 341 details were run: 56 percent to address firearm violence issues, 11 percent to address robbery patterns, 17 percent to address burglary patterns and the remainder targeted investigations of problem offenders or locations.

- In 2012, RPD worked to get legislation passed through City Council that requires pawn, second hand, and scrap metal dealers to submit their transactions electronically to the police department. Through IMPACT funding, RPD uses a vendor, LeadsOnline, to handle the electronic reporting process for the city. Through this service, RPD officers and investigators have near real-time access to transaction logs, enabling them to conduct stolen property investigations with unprecedented speed and efficiency.
- The RPD utilized IMPACT grant money to implement the “Hyper-reach” reverse dialing service. This service has been used to great effect in burglary hot spots during the course of 2012. The service enables RPD to automatically call all listed phone numbers within a geographic area defined by a user. In 2012, the system had contacted more than 15,000 residents across 26 burglary hot spots. Improving citizen awareness has resulted in reduced opportunities for burglars, and in some instances, yielded useful tips that have led to burglary arrests in the target area. The Hyper-reach service is a component of an expanded effort in 2012 to improve engagement with citizens of neighborhoods affected by burglary problems. In addition to using Hyper-reach, Neighborhood Service Center officers are assigned to canvass neighborhoods where burglary patterns are occurring, informing residents of the problem, offering personal safety tips and soliciting for investigative leads. When residents are not home, officers leave door hangers (funded by IMPACT) that contain similar safety tips and contact information.
- The Monroe County Sheriff’s Office conducted joint patrols with the Rochester Police Department during peak days for violent crime in late spring and throughout summer, with officers writing 102 field interview forms, making 86 arrests and recovering 33 weapons.
- The Monroe County Probation Department conducted 98 multi-agency warrant details, eight search details, three burglary details, four bike details, and four special details that addressed specific active gangs. In addition, Probation participated in 50 evening joint patrol details. All were funded through the IMPACT grant. During those details, Probation has recovered a total of 42 long firearms, 28 handguns, and 11 BB or replica guns.
- The Monroe County District Attorney’s Office has been following policies for several years that severely restrict charge reductions for violent felony defendants, expand the use of grand juries to swiftly indict defendants charged with serious crimes, and advocate that violent offenders receive the maximum sentences allowable under New York law. For the first nine months of 2012, 64 percent of defendants convicted of felony and misdemeanor weapons charges were sent to state prison, with an average prison sentence of 3.5 years; 12 individuals receiving sentences of five years or more, and one defendant received a life sentence. The District Attorney’s Office also continues to work closely with the U.S. Attorney’s Office through the Project Exile program to refer for federal prosecution those individuals that, when convicted federally, could face stiffer penalties for their crimes than they might receive in state court.
- IMPACT has also provided funding to the Boys and Girls Club of Rochester, allowing this community organization to increase the number of youth it enrolls in its Accelerated Reading program, and enhance the learning experience of its participants. The number of youth enrolled has increased by 83 percent since 2003, and the reading comprehension scores of those participating has also risen by 8.3 percent during this period.
- Probation continues as the lead agency in the DCJS-funded Monroe County Re-entry Task Force, coordinating the work of more than 40 agencies in an effort to curtail the high rate of recidivism by those offenders returning to the Rochester community from state or federal prison or from the Monroe County Jail. As Rochester state parole officers provide supervision and direction, contracted re-entry caseworkers provide support in those areas that

most often impact recidivism: housing, employment and mental health/substance abuse treatment.

NASSAU COUNTY – Nassau County Police

Targeted Crimes: Firearms, Robbery and Burglary

Agency Personnel Funded through Operation IMPACT

- The Nassau County District Attorney’s Office utilizes IMPACT funding to support a full-time re-entry coordinator.
- The Nassau County Probation Department utilizes IMPACT funding to support a full-time field intelligence officer.
- IMPACT grant money also is utilized to support a full-time crime analyst for the Hempstead Police Department.

Partnership Coordination

- The Nassau County Police Department implemented a Criminal Intelligence Rapid Response Team (CIRRT) consisting of police officers with varied backgrounds in narcotics, investigations and street level awareness and supervision. The model of intelligence-led policing was utilized based on constant and actionable information stemming from field intelligence reports, crime mapping, debriefings, investigations and other proactive measures.
- The partnership utilized Police Explorers for the distribution of awareness flyers at shopping centers and commuter railroad stations. Locations were chosen based on analysis of where robberies or burglaries were occurring. Community feedback was overwhelmingly positive for this initiative.
- The Gang Investigative Unit of the Nassau County Sheriff’s Department continuously provides actionable criminal intelligence to the partnership.
- Probation Night Watch visits persists in being a productive joint agency strategy employed by Operation IMPACT. Careful analysis of probationers result in visits that have provided arrests for guns, drugs and burglaries and afford law enforcement and the District Attorney’s office an occasion to debrief arrestees for further intelligence.
- The District Attorney’s Office reports that the Council of Thoughts and Action (COTA) received \$14,000 in funding for internships from the IMPACT VIII grant. This funding was essential to supporting the educational and vocational growth of formerly incarcerated individuals into the Hempstead community.

NIAGARA COUNTY – City of Niagara Falls Police

Targeted Crimes: Firearms, Larceny and Burglary

Agency Personnel Funded through Operation IMPACT

- The Niagara Falls Police Department utilizes IMPACT grant money to support a full-time crime analyst, field intelligence officer and a part-time research partner.

- The Niagara County District Attorney’s Office utilizes IMPACT funding to support a full-time assistant district attorney and a part-time assistant district attorney that are assigned to prosecute IMPACT-related crimes.
- The Niagara County Sheriff’s Office utilizes IMPACT funding to support a full-time field intelligence officer.

Partnership Coordination

- The Niagara Falls Police Department, in coordination with the Niagara IMPACT partnership, implemented an initiative titled Gun Reduction and Violence Eradication (GRAVE), geared towards reducing violent crimes perpetuated through gun violence.
- The Niagara County IMPACT partnership established a number of task forces that focused on reducing overall index crime, as well as specific crimes of focus for the partnership. These task forces were supported by numerous state and local law enforcement agencies.
- The Niagara IMPACT partnership continues to place a great emphasis on the issue of domestic violence. The DA’s Office provides specialized training to local law enforcement and continues to have a special prosecutor assigned to all domestic violence cases.
- The Niagara Falls Police Department utilized IMPACT grant money to purchase and maintain covert surveillance cameras. These cameras were instrumental in assisting investigators with the surveillance of suspects involved in criminal activity.

ONEIDA COUNTY - City of Utica Police

Targeted Crimes: Aggravated Assault and Burglary

Agency Personnel Funded through Operation IMPACT

- IMPACT grant money is used to support a total of three, full-time field intelligence officers with the Utica Police Department and Oneida County Sheriff’s Office.
- The Utica Police Department utilizes IMPACT grant money to support a full-time crime analyst. The crime analyst produces analytical data for command, patrol and investigative personnel to assist them in developing strategic enforcement operations in areas requiring special attention.
- The Oneida County District Attorney’s Office utilizes IMPACT grant funding to support a full-time prosecutor that is assigned to handle IMPACT-related crimes.

Partnership Coordination

- The Utica Police Department, with the assistance of other IMPACT partners, utilized intelligence gathered by the IMPACT-funded field intelligence officers to conduct targeted initiatives aimed at reducing violent crime. This intelligence resulted in the seizure of 455.9 grams of cocaine, 6,796 grams of marijuana, 224 grams of heroin, 1,226 prescription pills, \$101,681 in cash, and 13 handguns and long guns. A total of 300 individuals faced 198 felony charges, 390 misdemeanor charges and 153 violations. The members of the unit along with members of the Emergency Response Team conducted 117 narcotic search warrants.

- The IMPACT partnership was successful in lobbying for pawn shop and second-hand shop legislation, which will establish further controls and enforcement opportunities to combat the sale and distribution of stolen property. The partnership also conducted other initiatives aimed at reducing the number of burglaries in the IMPACT area.
- The Oneida County Probation Department and the state Department of Corrections and Community Supervision conducted 24 parole/probation home visit details in 2012. This detail partners burglary investigators with parole/probation officers performing home visits of persons on parole/probation regarding the crime of burglary in an effort to obtain intelligence regarding local burglaries; monitor parolee/probationer activity; cursory scan of residence for stolen property. More than 200 parolees and 200 probationers were spot checked in 2012.

ONONDAGA COUNTY – City of Syracuse Police

Targeted Crimes: Firearms, Robbery and Aggravated Assaults/Domestic Violence-related

Agency Personnel Funded through Operation IMPACT

- The Syracuse Police Department (SPD), Onondaga County Sheriff’s Office, and the Onondaga County Probation Department all utilize IMPACT grant money to support a total of four full-time field intelligence officers and one field intelligence supervisor.
- The Onondaga County District Attorney’s Office utilizes IMPACT grant money to support three full-time assistant district attorney’s assigned to IMPACT related crimes, and two full-time criminal investigators.
- The Onondaga County Sheriff’s Office utilizes IMPACT grant money to support a full-time crime analyst that is assigned to the Onondaga Crime Analysis Center.

Partnership Coordination

- The Onondaga Crime Analysis Center (OCAC) provided firearms-related analysis for the monthly IMPACT meeting to provide the partnership with a clear picture of the current shootings/shots fired trends, hot spots, results of enforcement efforts and status of offenders arrested.
- IMPACT saturation patrols were deployed in the high crime areas. Highway Gun Interdiction directed patrols are conducted by the SPD, Onondaga County Sheriff’s Office, and New York State Police.
- Communication between members of the Onondaga County District Attorney’s Office and members of the federal Bureau of Alcohol, Tobacco and Firearms to determine if any firearms cases would be better handled federally by the U.S. Attorney’s Office.
- The Drug Interdiction Response Team is supported by two field intelligence officers with IMPACT funding.
- In addition to utilizing many of the same strategies utilized for firearms, SPD used the second-hand dealer laws to target neighborhood stores, pawn shops and fencing operations. Stores and operations not in compliance were ticketed and owners arrested on various charges.

ORANGE COUNTY – City of Newburgh Police

Targeted Crimes: City of Newburgh – Burglary, Robbery and Aggravated Assault
City of Middletown – Robbery and Burglary

Agency Personnel Funded through Operation IMPACT

- The Newburgh Police Department and the Orange County Probation Department utilize IMPACT funding for two, full-time field intelligence officers.
- The Newburgh Police Department supported a full-time crime analyst with IMPACT funding.
- The Newburgh Police Department utilized IMPACT funding to support two, full-time neighborhood stabilization officers.
- The Orange County District Attorney’s utilized IMPACT funding to support a full-time criminal investigator.

Partnership Coordination

- The city of Newburgh Police Department’s (NPD) Neighborhood Stabilization Team (NST) conducts its activities based on current crime hot spots, specifically focusing on the IMPACT-targeted crimes.
- NPD conducted joint directed patrols with the Orange County Sheriff’s Office and New York State Police based on analysis of crime data.
- The city of Newburgh assigned a detective to focus solely on the crime of burglary. This resulted in an overall reduction in burglaries in the city of Newburgh.
- NPD utilized strategic deployment of both patrols and plain clothes units as crime patterns developed.
- NPD has developed strong partnerships with federal agencies and conducted joint investigations with those agencies.
- The city of Middletown, in conjunction with other IMPACT partners, conducted numerous warrant sweeps that resulted in a total of 22 arrests.
- The Orange County Sheriff’s Office coordinated the purchase and installation of digital signs for the Orange County IMPACT Partners. These signs display wanted person information, current crime trends and other information relevant to law enforcement.

RENSELAER COUNTY – City of Troy Police

Targeted Crimes: Firearms, Aggravated Assaults and Burglary

Agency Personnel Funded through Operation IMPACT

- The Troy Police Department, Rensselaer County District Attorney’s Office and the Rensselaer County Probation Office all utilize IMPACT funding to support a total of three full-time field intelligence officers.

- The Troy Police Department utilizes IMPACT funding to support a full-time domestic violence investigator.
- The Rensselaer County District Attorney’s Office utilizes IMPACT funding to support a full-time drug/gang investigator.

Partnership Coordination

- The partnership continues to coordinate investigations and criminal intelligence with the Albany Crime Analysis Center to ensure timely and accurate strategies geared towards reducing IMPACT related crime.
- The Troy Police Department, along with state and local partners, conducts warrant sweeps targeted at known repeat offenders.
- The Troy Police Department has expanded its domestic violence unit to help combat domestic violence assaults.
- The Troy Police Department increased DNA collection at burglary scenes in an effort to enhance burglary investigations.

ROCKLAND COUNTY - Village of Spring Valley Police

Targeted Crimes: Robbery, Burglary and Larceny

Agency Personnel Funded through Operation IMPACT

- The Spring Valley Police Department (SVPD) utilized IMPACT funding to support a crime analyst.

Partnership Coordination

- The Spring Valley Police Department utilized saturation/directed patrols based on crime analysis.
- When possible, the DA’s Office referred cases when federal prosecution could result in more effective sanctions.
- The DA’s Office utilized equipment purchases funded through Operation IMPACT to support criminal investigations.
- Joint home visits with parole and probation, coordination of investigations through the SVPD Special Investigations Unit and the utilization of the Rockland County Drug Task Force were all methods and strategies deployed based on intelligence gathered and analysis of “hot spots” related to the crimes of focus
- The Spring Valley Intelligence Unit conducted the debriefing of prisoners, which has helped significantly in identifying both locations and subjects involved in illegal activity.

SCHENECTADY COUNTY – City of Schenectady Police

Targeted Crimes: Aggravated Assaults, Larceny and Burglary

Agency Personnel Funded through Operation IMPACT

- The Schenectady Police Department and Schenectady County Probation Department utilize IMPACT funds to support a total of three, full-time field intelligence officers.
- The Schenectady Police Department employs a full-time crime analyst with IMPACT funding.
- The Schenectady County District Attorney's Office utilizes IMPACT funding to support full-time prosecutors assigned to IMPACT-related crimes.
- The Schenectady County District Attorney's Office utilizes IMPACT funding to support a full-time gang intervention specialist that is assigned to gang-related crimes.
- The Schenectady County Sheriff's Office utilizes IMPACT funds to support a correction officer responsible for gathering information related to IMPACT-related criminal activity.

Partnership Coordination

- The Schenectady Police Department utilizes Data-Driven Analysis for Crime and Traffic Safety (D-DACTS) to identify crime trends/hot spots and deploy resources to the areas identified.
- The Schenectady Police Department used weekly intelligence reports produced and disseminated by the IMPACT-funded crime analyst unit to target IMPACT related crime.
- Schenectady Police engaged in community based programs designed to divert at-risk youth into positive activities that will lessen the probability that the children will become involved in criminal activity. These programs include a summer youth program, the Limits of Loyalty Program and work with the Schenectady County Boys and Girls Club.
- The IMPACT partners collaborated in a joint operation that played a critical role in the dismantling of a violent street gang with the Safe Streets Gang Task Force.

SUFFOLK COUNTY – Suffolk County Police

Targeted Crimes: Firearms, Robbery and Burglary

Agency Personnel Funded through Operation IMPACT

- The Suffolk County District Attorney's Office utilizes IMPACT grant funding to support six full-time prosecutors assigned to handle all IMPACT related crimes. IMPACT funding also supports a research technician to assist with telephone analysis and warrants and subpoenas relevant to the analysis.

Partnership Coordination

- Reducing firearm-related crime by targeting subjects possessing or selling illegal firearms continued to be a technique used by the Suffolk County IMPACT partners. Utilization of

confidential informants, targeted debriefings and analysis of criminal history all were enhanced using IMPACT resources.

- Utilization of the DCJS e-JusticeNY/Integrated Justice Portal program for access to criminal history, SafeTnet de-confliction and obtaining target identification photos contributed to successful firearm investigations in Suffolk County.
- The telephone analysis program funded by IMPACT has been instrumental in identifying communication between persons suspected or identified as committing crimes of focus.
- The IMPACT-funded Digital Information Gateway program (DIG) has linked Suffolk County with the other IMPACT crime analysis centers, allowing for timely and accurate sharing of crime data.
- Crime Analysis Program (CAP) has been implemented within the Firearms Suppression unit to track non-fatal shootings, reports of shots-fired and other crimes in order to identify “hot-spots” to track these crimes more efficiently.

ULSTER COUNTY - City of Kingston Police

Targeted Crimes: Aggravated Assault and Larceny

Agency Personnel Funded through Operation IMPACT

- The Kingston Police department utilizes IMPACT grant funding to support a full-time crime analyst who tracks crime trends in order to develop prevention strategies aimed at reducing IMPACT-related crimes.
- The Ulster County District Attorney’s Office utilizes IMPACT funding to support a full-time prosecutor assigned to handle all IMPACT related crimes.
- The Ulster County Sheriff’s Office and the Ulster County Probation Office use IMPACT funding to support a total of two field intelligence officers.

Partnership Coordination

- Operation IMPACT provided funding for the deployment of directed patrols and investigations, used primarily in the hot spots provided through crime analysis
- Operation Clean Sweep, a multi-agency investigation, targeted illegal gang activity. In total, 536 felony charges were filed, 207 drug buys were made, 92 drug sales cases were made, two guns were recovered and 16 cars and a large amount of narcotics were seized.
- Operation IMPACT funding was used to purchase ArcGIS Version 10 Mapping Software, which allowed the Crime Analysis Unit to generate density mapping to further guide our crime reduction strategies.

WESTCHESTER COUNTY– City of Yonkers Police, City of Mt. Vernon Police

Targeted Crimes: Yonkers Police Department – Firearms, Aggravated Assaults and Burglary
Mt. Vernon Police Department – Firearms and Aggravated Assaults

Agency Personnel Funded through Operation IMPACT

- The Yonkers Police Department, Westchester County District Attorney’s Office, Mt. Vernon Police Department, and the Westchester County Probation Department all utilize IMPACT funding to support a total of four, full-time crime analysts.
- The Yonkers Police Department, the Mt. Vernon Police Department and the Westchester County Department of Public Safety utilize IMPACT funding to support a total of four, full-time field intelligence officers.
- The Mt. Vernon Police Department utilizes IMPACT funding to support a full-time gang/gun intervention officer.
- The Westchester County District Attorney’s Office utilizes IMPACT funding to support three, full-time prosecutors assigned to handle IMPACT related crimes.
- The Westchester County District Attorney’s Office employs a full-time criminal investigator utilizing IMPACT funding.

Partnership Coordination

- The Yonkers Police Department (YPD) utilized the tactic of saturated patrols in Operation Tight Grip, the directed patrol deployed on a rotational basis throughout the city, primarily in response to locations experiencing a spike in the focus crime of burglary.
- In conjunction with the State Police, YPD conducted an undercover investigation into street-level drug dealing that specifically targeted individuals with demonstrable gang affiliations who were conducting street-level drug sales in the IMPACT zone. Twenty-two individuals were either indicted or charged by felony complaint with sales of narcotics.
- With assistance from the Westchester County District Attorney’s Office, an undercover investigation into gun trafficking resulted in the arrest of a notorious gun supplier and his two associates, as well as the seizure of 47 firearms.
- Long-term investigations by the Yonkers and Mt. Vernon police departments into gang-related activity resulted in the arrest and indictment of numerous gang members in the IMPACT zone.
- YPD sponsored the passage of a new city of Yonkers ordinance governing second-hand dealers of precious metals.
- The Mount Vernon Police Department (MVPD) continued to use real-time crime statistics generated and analyzed by crime analysts as the basis by which police officers were deployed throughout the city, particularly in the IMPACT area.
- MVPD established the Levistar Towers mini-precinct, located within a residential complex within the heart of the IMPACT zone.
- The state DOCCS continued to work with the IMPACT jurisdictions on a continuous basis through the What’s Up and Re-Entry programs, which involved systematic and proactive scheduling of parolee home visits and information about the availability of social service and health care providers.

- The Westchester County Probation Department assisted the MVPD and YPD by arranging home visits for designated probationers residing in the IMPACT zone.

IV. STATE AGENCY CONTRIBUTIONS

NEW YORK STATE DIVISION OF CRIMINAL JUSTICE SERVICES

OFFICE OF PUBLIC SAFETY

DCJS Office of Public Safety (OPS) is responsible for the day-to-day oversight and administration of Operation IMPACT. The agency has assigned staff to work closely with the 17 IMPACT partnerships to assist them in implementing their strategies and to provide the IMPACT agencies with a single point of contact for all information and services provided to law enforcement by DCJS and other participating state agencies. IMPACT staff attend monthly IMPACT partnership meetings; provide follow-up in areas where a need is determined to exist; make referrals on training and other resources available through DCJS; and coordinate access to other state agency resources as needed. In addition, the IMPACT staff and the DCJS Law Enforcement Grants Unit closely monitor various performance measures that IMPACT agencies must meet as part of their participation in the program, such as the timely submission of all required crime reports, proper reporting on sex offenders, timely submission of DNA samples owed by qualifying offenders and proper designation of arrests that have a Hate Crime component or a Domestic Incident Report on file in conjunction with the arrest.

Since the inception of Operation IMPACT, DCJS staff has coordinated monthly “Crime Trends” meetings that require IMPACT partners to make a formal, comprehensive presentation on the status of their crime reduction efforts to the DCJS commissioner and other state partner agencies. The presentation is typically led by the police commissioner/chief of the primary jurisdiction with all agency partners presenting on their respective contributions to IMPACT initiatives. The meetings afford state officials the opportunity to ask questions and hold the IMPACT partnerships accountable for their performance.

CRIME ANALYSIS CENTERS

The Crime Analysis Centers are designed to enhance local efforts to combat Part 1 crime in four IMPACT counties - Albany, Erie, Monroe and Onondaga - that were selected because of the high volume of firearm and other violent crime in the primary jurisdiction and countywide. Using the data-driven policing model implemented through IMPACT, the centers take that approach to the next level through extensive cross-agency data sharing, both locally and statewide, sophisticated technological information dissemination tools and a professional interagency crime analyst staff.

The centers are governed by a board of directors that includes the district attorney, sheriff, police chief of the primary jurisdiction, the state police and DCJS. Each center is led by a director, employed by DCJS, who reports directly to the center program director in the Office

of Public Safety. This structure works to ensure that the centers are fulfilling the overarching goals of the state. The centers are staffed by civilian analysts that are supported with a portion of IMPACT and federal Byrne Justice Assistance Grant funding, as well as other IMPACT and locally-funded sworn and civilian analysts within the county IMPACT partnership. The analysts conduct in-depth studies of all city and county crime data, allowing all law enforcement agencies within each county to benefit from crime analysis as never before. The centers' analysts use software programs that allow them to link crimes, suspects, telephone numbers and other data from the various agencies within the county. This provides law enforcement with a broad view of the local crime scene, enabling authorities to discover potential criminal associations. The centers also use mapping software that provides a regional picture of where crime is being committed. These tools, combined with information drawn from numerous databases and records management systems from police departments in each of the counties, provide center staff and local police agencies with a wealth of information to combat crime.

The centers share crime information among each other using a single-inquiry search. The State Police, the Nassau Lead Development Center and the Suffolk County Police Department Intel Center also participate in this statewide crime information sharing network. More than 60 percent of the crime outside of New York City is shared to enhance the investigative capabilities of local analysts and law enforcement. The New York/New Jersey High Intensity Drug Trafficking Area (HIDTA) and the Franklin County District Attorney Drug Task Force also share in the statewide data sharing network with the other participants for license plate reader records.

The centers also emphasize effective dissemination of information. DCJS has funded digital signage in each center county, placing large video monitors on the walls in prominent places in police departments, precincts and parole offices, that broadcast information generated by the Crime Analysis Centers. The slides include most wanted bulletins, warrants, crime maps, alerts, and officer safety information. Bank robbery photos are often posted within 20 minutes of the robbery. There are more than 120 monitors distributed across the state.

The centers utilize Geographic Information Systems to provide accurate and timely crime maps to the command staff and officers in the field of the local agencies. These online maps highlight crime by any combination of type, date and area, and the incident narrative report. The centers also provide websites for local law enforcement to access in-depth information.

The commanding officer and the command staff of the Albany Police Department, the Buffalo Police Department, the Rochester Police Department and the Syracuse Police Department meet regularly with their respective center director to identify crime patterns that occurred in the previous 24 hours or more and to make determinations about the deployment of resources in response to those patterns. This regular interaction allows these four IMPACT jurisdictions to address crime patterns before they become crime trends. Every single center can point to cases that would likely still be unsolved were it not for the existence of the center, the technology available through the centers, and the expertise of the analysts staffed at the centers.

The centers are housed in the headquarters of the Buffalo Police Department, the Rochester Police Department, the Syracuse Police Department and the Albany Police Department's South Station.

OFFICE OF PROBATION AND CORRECTIONAL ALTERNATIVES

The Office of Probation and Correctional Alternatives (OPCA) has worked closely with probation departments within the 17 IMPACT counties and has extended the lessons learned through IMPACT to probation departments statewide. Under direct guidance of OPCA, local probation staff has been assigned as probation field intelligence officers (FIOs) within the IMPACT county probation departments. The role of the probation FIO is quite similar to the FIO assigned within a police department, but the intelligence that is gathered is obtained from people under probation supervision. The probation FIOs work hand-in-hand with the FIOs assigned within their respective partnerships to maximize both collaboration and data-sharing among IMPACT law enforcement agencies.

The information that probation departments can provide to law enforcement is unique and valuable, and more of that information is being used by law enforcement to enhance investigations and their intelligence systems. Probation officers conduct joint warrant and curfew enforcement initiatives, bar checks and "ride-alongs" with police officers and assist in identifying offenders that have a high risk of reoffending. Probation FIOs also have been assigned to all four Crime Analysis Centers.

OPCA encourages departments in non-IMPACT jurisdictions to embrace these strategies to enhance public safety throughout the state. Additionally, OPCA has promoted several initiatives statewide that provide benefits to the IMPACT partnerships. These initiatives include the following:

- Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) and Youth Assessment Screening Instrument (YASI) – COMPAS (for adults) and YASI (for juveniles) are risk/need assessment tools that assist probation departments in identifying probationers with the highest risk and need levels and assessing the "criminogenic needs" of probationers that must be addressed to prevent re-offending. All 57 probation departments outside of New York City utilize these web-based tools.
- Persistent Convicted Offender Report – OPCA has encouraged local probation departments to use the Persistent Convicted Offender Report, created by DCJS as a supervision tool to help focus resources on high-risk offenders. This report is county specific and identifies individuals with five or more convictions within a recent three-year period. The report indicates whether the offender is under supervision and is therefore valuable in assisting probation departments to focus supervision resources accordingly.
- DNA Collection – Probation departments are required by law to collect DNA samples from certain offenders. OPCA tracks the percentage of required DNA collected by probation departments. Since the inception of DNA collection through 2011, probation departments have collected more than 119,000 samples of DNA from probationers in New York State,

leading to the identification of offenders responsible for more than 1,000 crimes, including nearly 100 homicides.

- Probation Department Automation – OPCA is working with county probation departments and a state contract vendor to automate probation departments. This automation provides uniform data that can be utilized for crime analysis to support IMPACT strategies. Currently, 47 counties are either implementing or in production with the case management system, Caseload Explorer, and 41 counties have implemented the integration of Caseload Explorer with the state’s Integrated Probation Registrant System (IPRS). This information is now being provided directly to Crime Analysis Centers.

NEW YORK STATE POLICE

During 2012, the New York State Police continued to make contributions to Operation IMPACT efforts. The State Police participate in a variety of IMPACT initiatives and provide supplemental resources to enhance the police presence within the IMPACT jurisdictions. The Community Narcotics Enforcement Team (CNET) works with narcotics investigators in the IMPACT jurisdictions to address the sale and purchase of illegal narcotics and guns, and the Violent Felony Warrant Squad (VFW) adds resources and expertise in executing outstanding arrest warrants.

The State Police has continued to contribute personnel resources to assist with operation IMPACT efforts. The following data summarizes the number of sworn personnel assigned and the total number of hours worked in a variety of IMPACT details and initiatives in each jurisdiction.²

JAN. 1 THROUGH DEC. 31, 2012

IMPACT CITY	NUMBER OF EMPLOYEES	SCHEDULED SHIFT HOURS
Albany	9	6,396
Buffalo	36	2,994
Kingston	24	744
Mount Vernon	23	668
Nassau	1	8
Newburgh	15	1,424
Niagara Falls	1	8
Poughkeepsie	16	2,496
Rochester	2	24
Schenectady	25	2,436
Spring Valley	1	8
Utica	7	184
Yonkers	17	2,248
TOTAL	177	19,638

² For the purposes of these charts, the only IMPACT jurisdictions named are those where contributions were made by the NYSP.

The following information summarizes the number of felony, misdemeanor and violation arrests and calls for service the NYSP made/responded to in specific IMPACT jurisdictions.

JAN. 1 THROUGH DEC. 31, 2012

Jurisdiction	ARRESTS				CALLS FOR SERVICE
	FELONY	MISD	VIOL	TOTAL	
Albany					1,335
Binghamton		4	16	20	160
Buffalo	45	235	115	395	265
Jamestown					20
Rochester	120	640	440	1,200	1,860
Schenectady	8	24	28	60	292
Syracuse	4	20	16	40	540
Utica		4		4	184
TOTAL	177	927	615	1,719	4,656

Finally, in 2012, the State Police contributed to traffic safety and criminal interdiction efforts in 12 of the 17 IMPACT jurisdictions by issuing 4,949 traffic tickets and making 49 DWI arrests. They also continued to assist local police agencies by responding to and investigating 49 traffic accidents.

NEW YORK STATE OFFICE FOR THE PREVENTION OF DOMESTIC VIOLENCE

The New York State Office for the Prevention of Domestic Violence (OPDV) has been an active partner in Operation IMPACT since its inception. OPDV has attended and participated in the DCJS Crime Trends meetings. OPDV’s role increased beginning in 2008 when DCJS collaborated with OPDV to encourage the IMPACT jurisdictions to address domestic violence as a specific area in their IMPACT funding applications. Since that time, OPDV has provided support to jurisdictions as they implement their plans by providing training or technical assistance on domestic violence.

During 2012, OPDV provided 17 training sessions to 295 law enforcement officials in four of the 17 primary IMPACT jurisdictions. OPDV also provided technical assistance and training to IMPACT jurisdictions in a variety of different areas including: additions and revisions to Criminal Procedure and Penal laws including the new crimes of aggravated family offense and strangulation, new bail provisions for family offense cases, New York State mandatory arrest, primary physical aggressor, and expanded access to Family Court laws. Also, the use of Domestic Incident Reports (DIRs) and the DIR Repository as crucial investigative tools, orders of protection enforcement, Municipal Police Training Council-approved statewide domestic incident policy, elder abuse involving family or household members, and officer-involved domestic incidents.

In the 2012-13 RFA cycle, all IMPACT jurisdictions were strongly encouraged to design a domestic violence reduction strategy, required to participate in the Domestic Incident Report Repository, and submit the Domestic Incident Report flag on arrest cards. These additions to the

RFA were an effective means to encourage the jurisdictions to address domestic violence. While only two jurisdictions were specifically identified to develop a domestic violence reduction strategy, Albany and Syracuse, 12 of the 17 jurisdictions chose to identify a domestic violence reduction strategy. OPDV reviewed and provided input to DCJS on the content of all of the proposals, and has provided support to all jurisdictions through technical assistance and training.

During 2012, as part of a Grant to Encourage Arrest Program (GTEAP), OPDV completed an online training program that allows IMPACT jurisdictions and all other police agencies statewide to provide officers with domestic violence training in a convenient, efficient and cost effective manner without incurring costs for classroom training and travel. This online training provides four distinct training modules created specifically for New York law enforcement. The introductory module provides a general review of police response to domestic incidents and the other three allow officers to examine some of the unique concerns related to incidents involving rural locations, teen dating violence and elder abuse by a family member. OPDV also produced a short video titled *Another Domestic Incident – Another DIR?* that discusses the DIR as a valuable tool for police, probation, parole, prosecutors, judges, domestic violence victims and their advocates.

Finally, the GTEAP program allowed OPDV to partner with the Battered Women's Justice Project (BWJP) to provide training and technical assistance in March 2012 to four IMPACT sites: Albany, Nassau, Dutchess and Orange. OPDV, along with BWJP, worked with the communities to assess local needs and design training specific to those needs. The trainings focused on operating within a Coordinated Community Response (CCR) framework, primary aggressor analysis and risk assessment. The trainings were held on three different dates and were attended by law enforcement, advocates, and prosecutors.

DEPARTMENT OF CORRECTIONS AND COMMUNITY SUPERVISION

The New York State Department of Corrections and Community Supervision (DOCCS) continues to be an important partner of Operation IMPACT. DOCCS parole officers work daily with law enforcement agencies throughout the state as they supervise parolees released into their communities.

Parole officers participate in a variety of joint operations with other law enforcement agencies, conducting warrant sweeps, curfew enforcement and spot checks on alcohol establishments frequented by the offender population.

DOCCS recognizes the critical importance of intelligence development and information sharing. Parole officers routinely debrief parolees, soliciting information on recently committed crimes and other criminal activity. The department's Field Offices provide intelligence on parolees to other law enforcement agencies and in 2012, this information has been enhanced, particularly in jurisdictions with Crime Analysis Centers. An example of this enhanced intelligence sharing is ongoing in Monroe County. DOCCS Community Supervision is partnering with the Monroe Crime Analysis Center in a Global Positioning System (GPS) pilot program in which identified offenders under supervision are tracked by GPS. This data is compared to local burglaries committed in

specific areas in the city of Rochester. Any potential match between an offender and burglary is investigated collaboratively by the parole officer and local police.

Brief overviews of other DOCCS Community Supervision IMPACT activities are as follows:

Niagara County – Monthly IMPACT meetings at Niagara Falls Police Department are attended by the bureau chief and senior parole officer (SPO). Parole officers (PO) participate in weekly compliance checks with roving anti-crime unit. Ongoing intelligence sharing is conducted between the SPO/POs and members of local law enforcement.

Broome County – The local field parole officers are involved in an average of two operations per month focusing on pre-delinquent home visits and absconder search of parolees, along with conducting registered sex offender residence verifications and joint warrant activity.

Monroe County – Monthly IMPACT meetings are attended by the parole bureau chief and senior parole officer and field activities are run in conjunction with the Rochester Police Department. Parole officers attend roll call with the other participating agencies and set the course of action for the evening. Intelligence is shared and high crime areas are focused on.

Erie County – Monthly IMPACT meetings at Buffalo Police Department are attended by the bureau chief and/or senior parole officer. Parole officers participate in compliance checks with the Buffalo police's Mobile Response Unit (MRU) each month.

Chautauqua County – Monthly IMPACT meetings at Jamestown Police Department are attended by the senior parole officer. Parole officers conduct joint patrols with police regularly. Periodic special details with targeted home visits are scheduled throughout the IMPACT year.

Onondaga County – The Syracuse field office focused on joint home visits with Onondaga County Probation and intelligence sharing with the U.S. Marshals Service, New York State Police, Onondaga County Sheriff's Office and Syracuse police.

Oneida County – The Utica field office conducted joint home visits with the Oneida County Probation Department and the Utica police focusing on sex offender verifications.

Rensselaer County – The Northeast Field office worked collaboratively with the federal Drug Enforcement Administration and Bureau of Alcohol, Tobacco, and Firearms, Rensselaer County Sheriff's Office and Troy police on intelligence gathering and sharing with a focus on guns and robbery crime reduction. The partners met regularly to exchange information and to target specific active groups and areas based on real-time crime analysis.

Westchester County – The New Rochelle field office regularly conducts warrant enforcement activity with the Yonkers and Mt. Vernon police departments.

Orange and Rockland counties – The Peekskill field office conducted specific home visit operations with the Spring Valley (Rockland County) police, targeting offenders with a history of burglary offenses. In addition, the local office worked with the Middletown police (Orange County), conducting spot checks on establishments serving alcohol that are frequented by the offender population.

Dutchess and Ulster counties – In March 2012, during an operation in which more than 100 people were arrested in and around Kingston, 15 to 20 parolees had been identified as targets in the weeks prior to the sweep. The Poughkeepsie field office worked with Kingston police to successfully take all but one of the parolees into custody prior to the day the actual sweep took place.

Suffolk and Nassau counties – The 2012 Operation IMPACT activities for both of these counties include participating in the monthly meetings and sharing intelligence.

Albany and Schenectady counties – During the past year the Albany bureau has been very active in both Albany and Schenectady counties. In Albany County, teams of five officers participated in saturation patrols and home visits with detectives from the Albany police. In Schenectady County, monthly saturation patrols were conducted. The Office of Field Intelligence in Schenectady provides regular reports on all criminal activity in the city, as well as specific information on persons of interest. Any parolee noted in the report, as well as absconders or pre-delinquent offenders, become a focus of the details. In the past year, IMPACT details in both counties have resulted in 12 technical arrests, two new arrest and eight absconders apprehended.

These examples of collaborative efforts contribute to strategies to address crime spikes within the communities of the participating counties. Intelligence sharing helps to identify gang/criminal enterprise members and operations. Joint IMPACT warrant enforcement operations enhance public safety through the apprehension of parole absconders.

APPENDIX A

Index Crime Report 2011 vs. 2012

This section includes the December monthly report which also includes full year 2012 data. This report shows the monthly and year-to-date Index crime trends for each of the 17 primary jurisdictions.

Reported Crime Primary IMPACT Jurisdictions

Prepared by Division of Criminal Justice Services

January - December 2012 vs. 2011

As of 1/31/2013

	Current Month - December			Year-to-Date		
	2011	2012	% Change	2011	2012	% Change
IMPACT TOTAL						
Total Index Crimes	9,520	8,470	-11.0%	109,644	106,933	-2.5%
<u>Violent Crime</u>	1,276	1,165	-8.7%	15,485	15,841	2.3%
Murder	17	11	-35.3%	149	167	12.1%
Rape	50	43	-14.0%	634	657	3.6%
Robbery	556	529	-4.9%	6,006	5,852	-2.6%
Aggravated Assault	653	582	-10.9%	8,696	9,165	5.4%
<u>Property Crime</u>	8,244	7,305	-11.4%	94,159	91,092	-3.3%

Note 1: Recent increases in aggravated assault is due in part to recent improvements in the completeness of monthly crime reports.

Note 2: 13 homicides reported in April 2009 reflect a single incident where 13 victims were killed by one gunman during a mass shooting on April 3rd, 2009.
