

New York State Crime Report

Andrew M. Cuomo Governor

Michael C. Green Executive Deputy Commissioner

May 2015

Crime in New York State 2014 Preliminary Data

This report provides preliminary information on the number of Index crimes and rates per 100,000 population for New York State, its two regions and each of its 62 counties in 2014.

The FBI annually provides the state Division of Criminal Justice Services (DCJS) with county population data based on U.S. Census estimates and the agency use those data to calculate crime rates.

Crime counts are based on official crime reports submitted by law enforcement agencies to DCJS through the Uniform Crime Reporting (UCR) and Incident Based Reporting (IBR) programs.

The FBI and New York State use seven Index crime categories as indicators of overall crime trends: violent crimes of murder, rape*, robbery, and aggravated assault; and property crimes of burglary, larceny and motor vehicle theft.

This report details Index crimes reported in New York State and its two regions — New York City and non-New York City — annually for the last 10 years. It also compares Index crimes by county for 2014 vs. 2013.

Index crimes for each reporting agency from 2010 through 2014 are available on the DCJS website: www.criminaljustice.ny.gov/crimnet/ojsa/stats.htm

* See Page 11 for more information.

Crime in New York State reached an all-time low in 2014, with 408,275 Index crimes reported.

The state also experienced significant declines in crime *rate* (the number of Index crimes per capita) and crime *volume* (the total number of Index crimes reported) over the past decade.

Change in Crime Rates: 2005 vs. 2014

Over the past 10 years, the overall rate of Index crimes per 100,000 residents declined 19 percent. The rate of violent crimes fell 18 percent and property crimes were down 19 percent.

From 2005 to 2014, the largest reductions in crime rates were reported for motor vehicle theft, murder, robbery and rape (See Appendix 1, which details a statewide, annualized comparison of crime rates).

Percentage Change in Crime Rates 2005 vs. 2014

Change in Crime Volume: 2005 vs. 2014

New York State's crime rate has decreased over the past 10 years, the result of significant reductions in reported crime coupled with an increase in the state's population. In 2014, there were 81,125 fewer crimes reported than in 2005. Reported crime has not been lower since the state started tracking annual data in 1975. Meanwhile, the state's population increased by approximately 490,000 residents during the same 10-year period.

Trends in Regional Crime: 2005 to 2014

The state's two regions — New York City (five counties) and non-New York City (57 counties) — experienced similar declines in Index crime over the last 10 years.

The number of Index crimes reported in New York City fell 14.7 percent between 2005 and 2014, while the rate of decline was 18.1 percent in the rest of the state. The counties outside of New York City accounted for 55 percent of the reported crime statewide, and almost 60 percent of the property crime that was reported in 2014.

The decline in violent crime over the last 10 years was nearly three times greater outside New York City (-26.1%) than in New York City (-9.5%).

Collectively, the 57 counties outside New York City have reported a steady decline in violent crime since 2006. New York City's five counties reported increases in violent crime between 2009 and 2012 but reported a slight decline in 2013 and 2014.

New York City accounts for 68.4 percent of the violent crime reported in New York State (See Appendix 2).

Statewide Crime Trends: 2013 vs. 2014

Preliminary 2014 crime data show that crime volume in New York State declined 5.6 percent between 2013 and 2014.

New York State reported a decline in all Index crime categories except motor vehicle theft as compared to 2013. Motor vehicle theft increased by 1.4 percent in 2014.

Violent crime declined 5.5 percent while property crime declined 5.7 percent. The largest declines were reported in robbery (-11.8%) and burglary (-10.3%).

Percentage Change in Crime Volume 2013 vs. 2014

New York City

The total number of Index crimes in New York City decreased by 4.7 percent between 2013 and 2014. There was an increases in motor vehicle theft (+3.9%) during the period.

In the violent crime category, robberies dropped significantly (-13.5%), while rape decreased by 3.8 percent. There were also declines in two property crime categories: larceny (-4.9%), and burglary (-4.2%).

Non-New York City

Reported crime outside of New York City decreased by 6.4% between 2013 and 2014.

Decreases were reported in all crime categories. In the violent crime category, murder (-9.7%) and robbery (-7.7%) declined significantly. In the property crime category, the largest decline was reported for burglary (-12.9%).

Crime counts for 2013 and 2014 are presented for each county in Appendix 3; county crime rates for 2014 are detailed in Appendix 4.

Trends in Violent Crimes by Firearm

The Division of Criminal Justice Services collects data from law enforcement regarding the number of reported violent crimes that involved the use of a firearm. Between 2013 and 2014, violent crime involving firearms decreased in New York City by 6 percent, with 446 fewer crimes reported. During the same time period, violent crimes by firearm outside New York City decreased by 4 percent, with 173 fewer crimes reported (See Appendix 5).

Regional Trends in Homicide

Mirroring the trend in overall index crime, the number of homicides reported statewide in 2014 reached the lowest point since crime reporting began in 1975. Homicides decreased by 30 percent (875 vs. 612) when comparing 2005 to 2014 and have steadily declined since 2010 (-29%). Homicides by firearm show a similar trend, with a decrease of 30 percent over the past 10 years and a decrease of 33% between 2010 and 2014. This is driven primarily by a decline in the number of homicides reported by New York City (See Appendix 6).

Note: NA indicates that the percentage change is not applicable because the count in 2013 was zero.

Source: DCJS, Uniform Crime/Incident-Based Reporting system.

Includes all reports received as of 4/22/2015.

Note: Data included in this report differ slightly from those published by the FBI, as that agency estimates Index crimes for agencies with incomplete reporting, and excludes data submitted after FBI deadlines.

^{*} The FBI expanded the list of sex offenses categorized as the Index crime of rape, a change that took effect in 2013. Rape counts detailed on Pages 1 through 13 of this report conform to the pre-2013 definition of the crime. Appendices 7 and 8 provide additional information about the expanded definition of rape and data for 2014 relevant to that change.

Appendices 7 and 8: Federal Changes in Rape Reporting

The U.S. Department of Justice has expanded the definition of rape that is used by law enforcement agencies when collecting and reporting Index crime statistics through the national Uniform Crime Reporting (UCR) program. Effective in January 2013, this change was made to more accurately reflect the scope and volume of sexual assaults nationwide and in New York State.

Prior to the expanded definition taking effect, a violent sexual assault was only classified as the Index crime rape if the victim was a female who had been vaginally penetrated by a male. The federal Justice Department established that limited definition in 1929 and it remained in effect through the end of 2012. The UCR program classified any other sexual assaults during that time frame as "Part II" sex offenses.

The new definition includes the historical elements but also encompasses female and male victims, in addition to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim."

The New York State Crime Reporting Program, part of the Office of Justice Research and Performance at the Division of Criminal Justice Services (DCJS), notified all law enforcement agencies of these reporting requirements (http://criminaljustice.ny.gov/crimnet/ojsa/crimereporting/rape_memo.pdf) in 2012 so they could modify their data collection systems to track crimes under the expanded definition.

At the same time, DCJS modified how it collects data in-house and as a result, can identify rapes reported under each definition, allowing New York State to continue compiling historical trends in rape reporting while also analyzing the impact of expanding the definition of the crime. These changes also provide the Crime Reporting Program with a mechanism to monitor law enforcement agencies' compliance with new reporting requirements.

New York City implemented the change and in 2013, and began reporting the expanded rape counts to DCJS that year. In 2014, 342 (65%) of the 522 active law enforcement agencies outside New York City either reported rape counts under the expanded definition or had the appropriate technical capabilities to collect the data. Those agencies reported 85 percent of sex offenses outside New York City to DCJS in 2014. Of the 180 agencies that reported no rape counts under the expanded definition in 2014, nearly half (48%) are small agencies that reported no sex offenses during the year and are not expected to report a large number of rapes under the new definition. DCJS is working with the 180 law enforcement agencies that are currently not reporting this information to help them implement the change.

The following appendices provide additional information:

Appendix 7: New York State Rapes by County: 2014 details the total number of rapes reported by county, as well as those offenses that meet the historic definition, and those that are now defined as rape based on the 2013 expansion.

Appendix 8: New York State Rape Arrests by Penal Law: 2014 provides arrest counts for Penal Law Article 130 (Sex Offenses) crimes in two ways: those crimes included in the historical definition of rape and those crimes included under the expanded definition. These arrest statistics were compiled based on top charge, meaning the crime noted was the most serious an individual faced.

Note: Not all crimes result in arrests. As a result, the number of arrests is lower than the number of incidents reported to the New York State Crime Reporting Program.
