Division of Criminal Justice Services

Crime in New York State

2006 Preliminary Data

This report and the attached appendices provide the most complete information available on the number of Index crimes and rates per 100,000 population for each county in New York State. County population data are provided every year by the FBI based on US Census estimates and are used to calculate crime rates. Crime counts are based on official crime reports submitted to DCJS through the Uniform Crime Reporting (UCR) and Incident Based Reporting (IBR) programs. Index offenses include the *violent* crimes of murder, forcible rape, robbery and aggravated assault; and the *property* crimes of burglary, larceny, and motor vehicle theft. The crime rates show the number of incidents reported per 100,000 residents.

The summary includes information on crimes reported in New York State for the last 10 years. These figures include all reports received by DCJS as of May 11, 2007. Data for 2006 are preliminary and subject to change as reporting becomes complete.   These figures will also differ slightly from those published by the FBI. The FBI reports include estimations for agencies with incomplete reporting, and exclude data submitted after FBI deadlines.

Detailed information on crime data for each reporting agency from 2002 through 2006 is available on the DCJS website: http://criminaljustice.state.ny.us/crimnet/ojsa/indexcrimes/counties.htm

Crimestat Report

Issued: June 4, 2007

Crime in New York State

Over the past 10 years, the crime rate in New York State has declined steadily. The largest reductions in crime rate were reported for motor vehicle theft, burglary, and robbery. Overall, the rate of index crimes per 100,000 resident population has declined 37% since 1997; the rate of violent crimes (murder, rape, robbery, and aggravated assault) and property crimes (burglary, larceny, and motor vehicle theft) also fell 37%. Appendix 1 provides both crime counts and rates for each year.

Percentage Change in Crime Rates
1997 vs. 2006
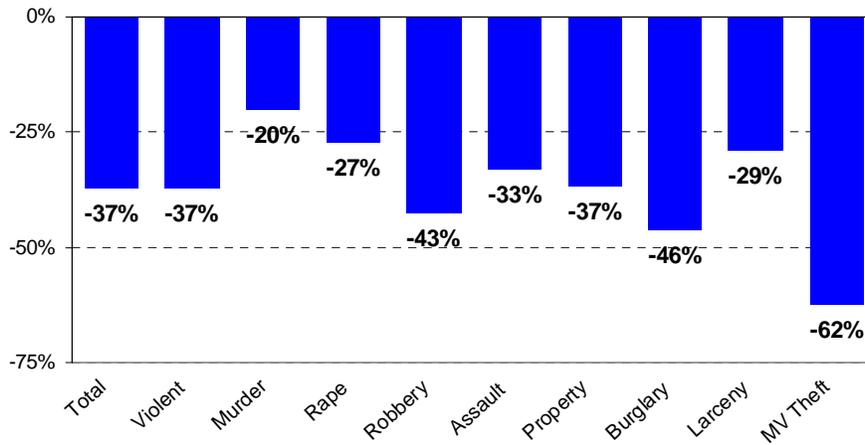

While New York State's crime rate has decreased greatly over the past 10 years, New York has also reported a significant reduction in the actual number of crimes reported. Since 1997, the number of major crimes reported has fallen every year to the lowest levels recorded since statewide reporting began nearly 40 years ago. In 2006, there were 233,706 fewer crimes reported than in 1997, while the population of the State has increased by over one million since 1997.

New York State Total Crime Counts
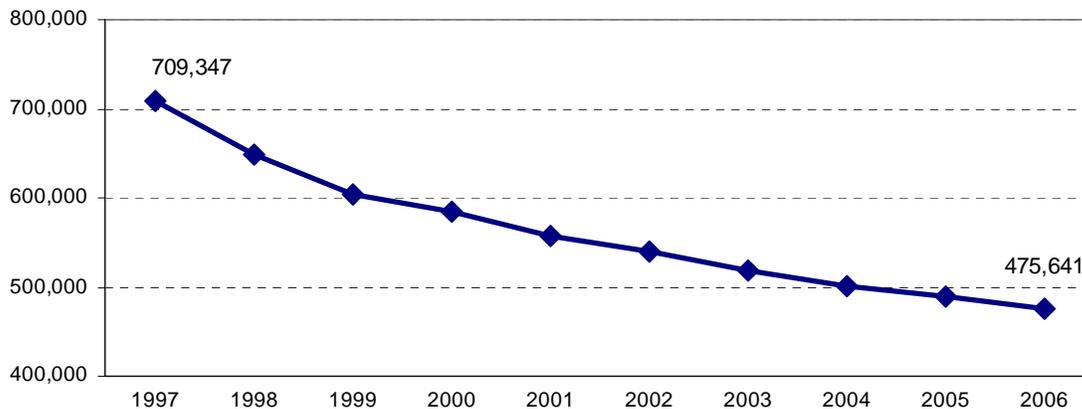

Crime in New York State

Regional Crime as a Percent of Statewide Crime
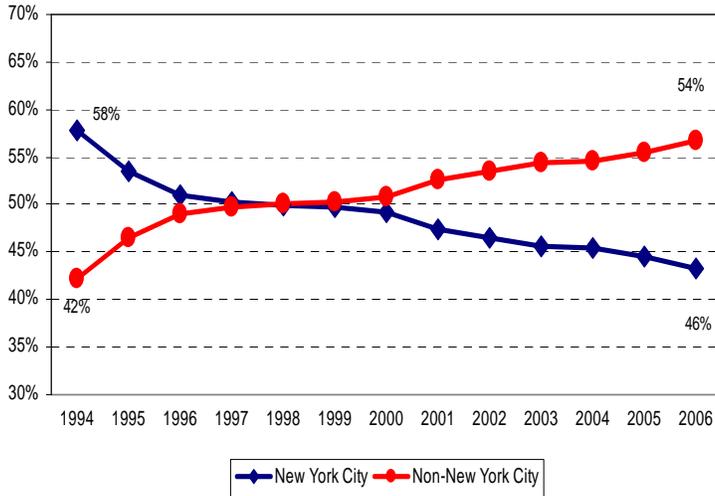

Not all areas of the State have benefited equally from the historic reduction in crime. Over the last 13 years, the decline in Index crime in New York City was much larger than that experienced in counties outside of New York City (42% vs. 23%). Appendix 2 provides detail by region.

Given the greater decline in crime in New York City, the proportion of statewide crime that each region accounted for has shifted dramatically. The counties outside New York City now account for 54% of the reported crime statewide, as compared to 42% in 1994.

While a higher proportion of the State's violent crimes occurred in New York City, that region reported a 44% drop in violent crimes since 1997, while the Non-New York City counties reported a decline of less than 2%. While all violent crime categories declined in New York City between 1997 and 2006, the Non-New York City region reported increases in both murders and rapes over the last 10 years. The detail is provided in Appendix 2.

Regional Trends in Violent Crime

2
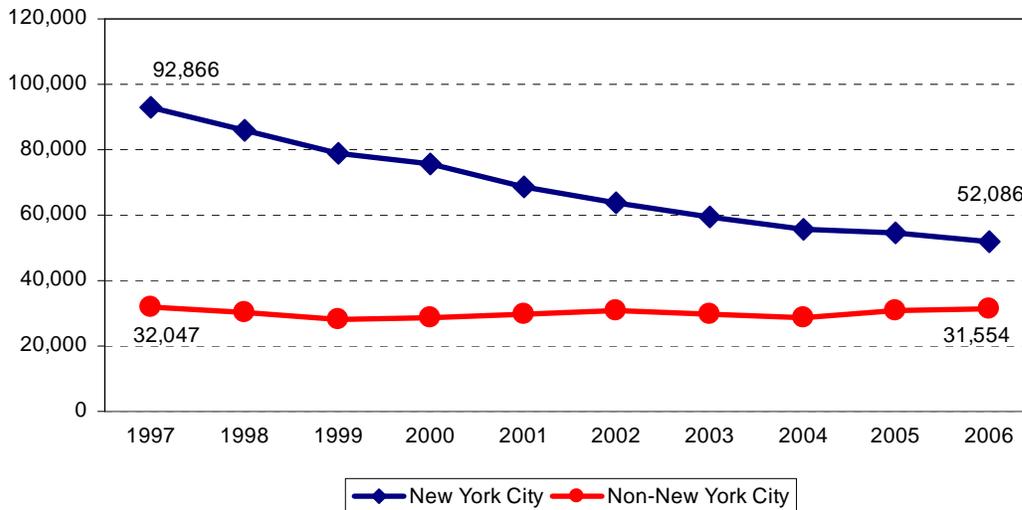

Crime in New York State

Recent Statewide Crime Trends: 2005 vs. 2006

The most recent 2006 crime data show that crime volume in New York State declined for the 16th consecutive year.

Percentage Change in Crime Volume 2005 vs. 2006
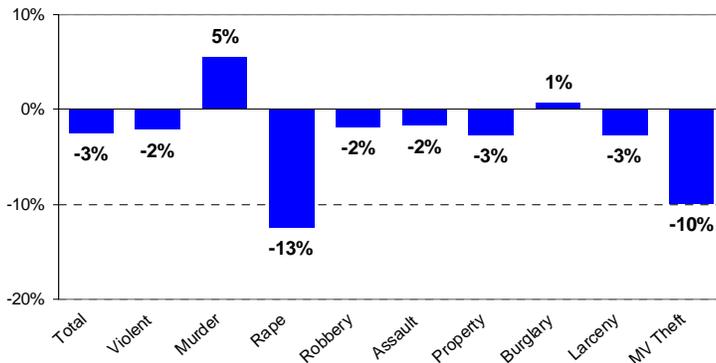

In 2006, New York State reported an overall drop of 3% in the seven major Index crimes as compared to 2005.

Violent crimes dropped by 2%. Murder was the only violent crime to increase (+5%).

Property crimes were down 3% driven by a 10% drop in motor vehicle thefts. Burglary was the only property crime to increase (+1%).

The New York City region reported much greater declines in index, violent and property crimes between 2005 and 2006 than the Non-New York City region. Crime counts for 2005 and 2006 are presented for each county in Appendix 3, and county crime rates for 2006 are provided in Appendix 4.

PERCENTAGE CHANGE IN CRIME VOLUME BY REGION: 2005 vs. 2006

New York City
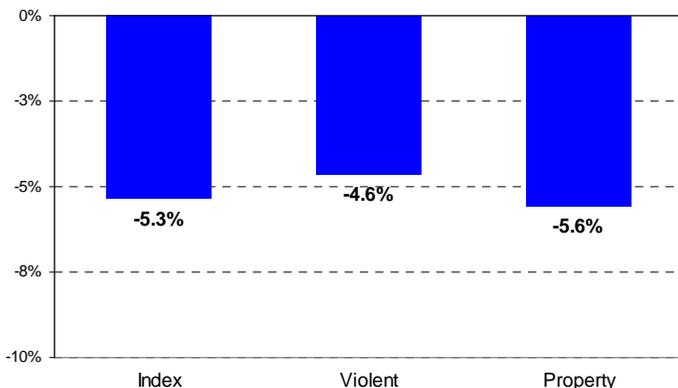

Non-New York City
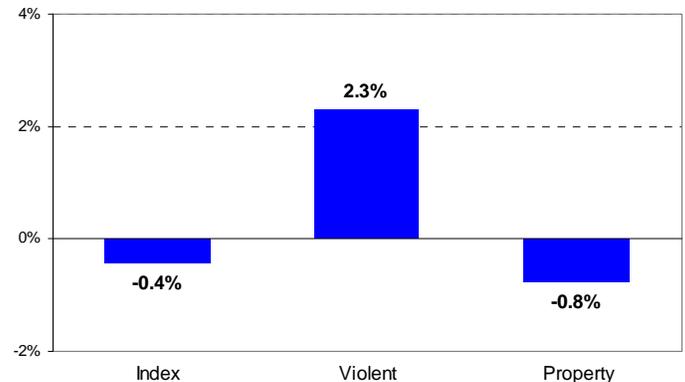

Crime in New York State

The Uniform Crime Reporting system includes information provided by law enforcement regarding the number of violent crimes reported which involved the use of a firearm. Currently, these figures are only available from the Non-New York City region. There were 6,143 reported violent crime incidents which involved a firearm during 2006, an increase of 7% over 2005, and 14% over 1997. Appendix 5 provides counts of firearm related crimes for each of the violent Index crimes.

Violent Crimes by Firearm: Non-New York City
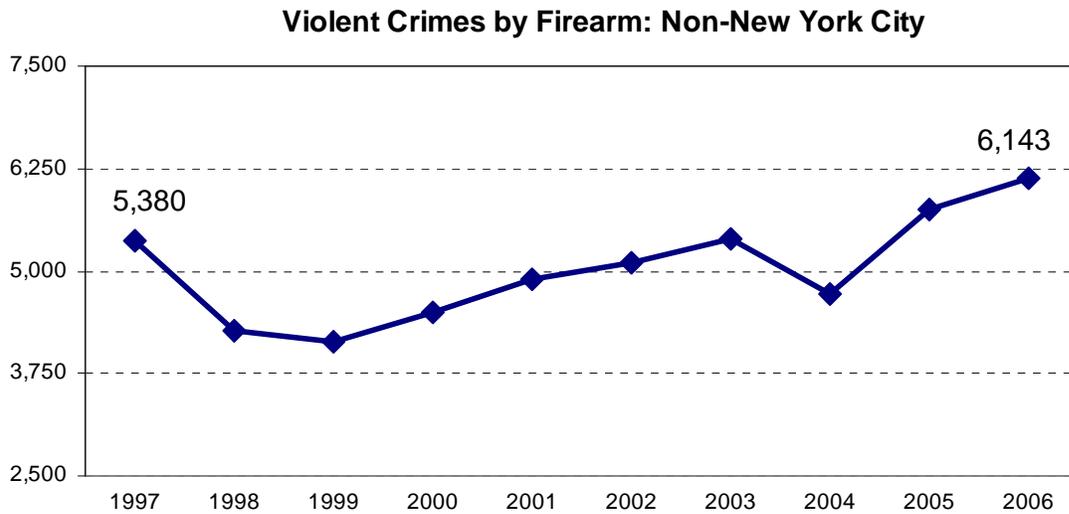

Appendix 5 shows that during 2006, 183 of 326 murders reported outside of New York City involved a firearm (56%). The number of robberies which involved a firearm increased by 5%, from 3,248 in 2005 to 3,401 in 2006. There were 2,524 aggravated assaults which involved a firearm reported in 2006, an increase of 10% over the 2,287 reported in 2005. During 2006, nearly 14% of all reported assaults involved a firearm, an increase from prior years.
