Criminal Justice Processing Reports

How to Use these Reports

In 2018, the Division of Criminal Justice Services, Office of Justice Research and Performance (OJRP) developed a set of new reports to replace the Felony Processing Reports which DCJS had been producing and disseminating to District Attorney offices for the past two decades. With input from a workgroup of District Attorney Offices and other stakeholders, OJRP produced a series of new tables that provide information on felony case outcomes and other criminal justice trends within the county and the rest of the state. The purpose of the new report is to comply with DCJS statutory reporting requirements and better leverage available state data to aid District Attorneys with monitoring trends, workload, and performance.

This guide was produced to support District Attorney offices in utilizing the tables provided in the new report. The attached mock report from 'Sample County' provides a brief description of each table and demonstrates how the tables can be used. Below is a listing of the tables contained in the new report and questions each table can answer.
