

Probationer Felony Re-Arrest Rates Following Sentence to Probation

**Division of Criminal Justice Services
Office of Justice Research and Performance**

Date Prepared: March 1, 2018

Probationer Felony Re-Arrest Rates Following Sentence to Probation Report Methodology

This report focuses on probationer recidivism. Probationers are examined as a group, based on year of sentence in a New York State court. Interim supervision cases are excluded. The same group of probationers is followed for one, two and three years.

- If a probationer has transferred between counties during the followup period, they will be reported in the county of supervision at the time the analysis was prepared.
- The two and three-year follow up for the 2016 group, and three-year follow up for the 2015 group are not shown since not enough time has passed for evaluation to occur.

Number Sentenced During Year - Number of felony and misdemeanor offenders sentenced to probation during the reporting period. If a probationer has more than one sentence to probation during a year, each sentence will be included in the count.

Percent Arrested for VFO - Percent of probationers sentenced who were arrested for one or more **violent felony offenses** within the reporting period.

Percent Arrested for Felony Drug Offense - Percent of probationers sentenced who were arrested for one or more **felony drug offenses** within the reporting period.

Percent Arrested for Other Felony Offense - Percent of probationers sentenced who were arrested for one or more **other felony offenses** within the reporting period.

- If a probationer has been arrested in more than one category during the follow up period (VFO, Drug, and Other), they will be counted in each category.

Total Percent Arrested - Percent of probationers who were arrested for **any felony offense** within the reporting period.

- Probationers with multiple arrests in more than one category are counted only once in the *Total Percent Arrested*.

Important Note: Because probationer characteristics differ from county to county, comparisons among county probation departments are not meaningful. Research has shown that age and criminal history strongly influence re-arrest rates. In addition, DWI offenders have lower re-arrest rates than other offenders. Counties with a high proportion of DWI probationers, which includes many counties outside New York City, show significantly lower felony re-arrest rates than other counties.
