Instructions: This form is to be used when a sexual assault patient or guardian authorizes the collection of sexual assault evidence and there is suspicion of a drug facilitated sexual assault. Please include patient’s / guardians’ initials on designated lines; complete signatures are required at the bottom of the form.

A mature minor who presents at a hospital emergency department may consent or may choose not to consent, without parental involvement, to a forensic exam, in the course of post-sexual assault care.

This consent form is not meant to describe all components of a sexual assault medical forensic exam. Fully informed consent must be obtained from the patient throughout the exam through ongoing verbal communication between the provider, the patient and the guardian, if any. Save this form in the patient’s electronic medical record. A copy may be distributed to the authorizing person (patient and or guardian) and law enforcement, if released.

Consent for Drug Facilitated Sexual Offense Evidence Collection
I agree to let the provider collect blood and urine specimens using the New York State Sexual Offense Evidence Collection Kit, Part B. I understand that this is for the purpose of identifying the presence of drugs as a part of a sexual assault exam. This evidence will be used if I want to report the crime to law enforcement.

I understand that I can say no to any or all parts of this exam and evidence collection at any time. The provider has told me about my rights by giving me a copy of the “New York State Sexual Assault Victim Bill of Rights” and offering to explain it to me.

Please put your initials next to your choice:

- Collection of Blood
  - Yes _____ No _____

- Collection of Urine
  - Yes _____ No _____

Consent for Release or Storage of Drug Facilitated Sexual Offense Evidence is included in the Part A Consent for the kit as a whole.
