

Key Points

- ◆ Agencies who participate in NY-DEx will be granted access to search local, state, tribal and federal data to assist in the investigative analysis process.
- ◆ Access to search is available via the eJusticeNY IJ Portal .
- ◆ No fees are required to access NY-DEx.
- ◆ Participating agencies own and maintain the sharing of their data.
- ◆ NY-DEx client sharing controls allow contributors to define exactly how and what kind of data to share.
- ◆ For SJS based source agencies, DCJS will provide a free installation of the DCJS NY-DEx client application.
- ◆ NY-DEx data is passed on to the FBI N-DEx system to allow sharing on a national level.
- ◆ Data must not be disseminated, nor any law enforcement action taken, without first contacting the record-owning agency.
- ◆ The first step to contributing data to NY-DEx is executing a MOU with DCJS, available at: <http://www.criminaljustice.ny.gov/xnysit/nysit.html>.

Search shared data across jurisdictions to enhance your investigation.

system access via
eJusticeNY Integrated
Justice Portal*

agencies in the investigative analysis process and provide the opportunity for proactive policing by enabling data-sharing across jurisdictions. User access to the first system release began in January 2012 with single sign-on into the FBI's National Data Exchange (N-DEx) Search via the eJusticeNY Integrated Justice Portal. The second release will enable NY-DEx Search.

How do I submit my Data?

NY-DEx will provide functionality to extract data from the source agency's records management system database and send the data to the NY-DEx data repository via a NY-DEx client application. NY-DEx supports SJS, J2SS and IMPACT record management systems. In addition, DCJS is collaborating with Erie County and the Albany Police Department by assisting with implementation of their inbound exchange. DCJS has built and will provide the NY-DEx client application for agencies using SJS at no cost to the agency,

In all cases, the first step to contributing data to NY-DEx is executing a memorandum of understanding (MOU) with DCJS. The MOU form can be found on the New York Data

Exchange website located at <http://www.criminaljustice.ny.gov/xnysit/nysit.html>.

Who controls the data?

The NY-DEx client application provides the functionality to apply record-level sensitivity business rules which control the dissemination of the information/data.

*Source agencies
control dissemination
of their data
records.*

These rules are defined and set by the local data contributors. The data contributors can set sensitivity rules associated to the records based on criteria including, but not limited to UCR Type, Incident Type, and Incident Number.

The sensitivity levels are:

LEVEL 1 – NOT RESTRICTED (GREEN)

NY-DEx shall provide the capability for data contributors to share all of their data.

LEVEL 2 – CONTROLLED (YELLOW)

NY-DEx shall provide the capability for data contributors to specify controlled or "pointer based" sharing of data (i.e. provide point of contact information only). The source agency can view the data; NY-DEx will provide incident number and contact information to all other agencies.

LEVEL 3 – RESTRICTED (RED)

NY-DEx shall provide the capability for data contributors to restrict data they submit to NY-DEx. This level is reserved for the most restricted investigations and investigative information. The

source agency can view the data; NY-DEx will restrict access to the data to all other agencies.

The source agency will have the option to send their data forward from the NY-DEx data repository to the N-DEx data repository, making their data available to other states and federal agencies participating in the N-DEx program. The same sensitivity levels apply for N-DEx. Source agencies will be provided access to search both NY-DEx and N-DEx data from the eJusticeNY Integrated Justice Portal, enabling one-stop shopping.

How will I access NY-DEx data through the eJusticeNY Integrated Justice Portal?

Access to the NY-DEx data is available on the eJusticeNY IJ Portal via the N-DEx search system for authorized law enforcement users whose agency has executed a MOU with DCJS.
